

GLANDULAR MEDICINES

The time tested JNSON's Glandular Medicines are being manufactured from authentic raw materials (Endocrine Glands) and have proved time and again of their efficiency.

THE ENDOCRINE GLANDS

The Endocrine Glands are called ductless glands because secretion they make does not leave the glands by means of a duct, instead it is passed into the blood, circulating through the substances of the gland. The word endocrine comes from the Greek and means "internal secretion." The active principle of an internal secretion called hormone, from a Greek word meaning "to excite." Some of the endocrine organs produce a single hormones which control the activity of many of the other endocrine organs, for this reason the pituitary has been described as "the master gland of the body." The major endocrine or organs used for the medicinal preparation are Corpus Luteum, Mammary, Ovaries, Pancreas, Parathyroid, Pineal G.L., Pituitary, Placenta, Prostate, Spleen, Suparenal, Testes, Thymus, thyroidinum. The indication of these glandular medicines are as follows.

BRAIN

The brain is the complex organ that controls thought, memory, emotion touch, motor skills, vision, breathing, temperature, hunger and every process that regulates the body. One of the important functions of the brain is to stimulate various endocrine glands through signals to maintain optimum levels of hormones in blood. This remedy helps to regulate general well being and functioning of brain especially the growth regulation and thyroid gland regulation, by regulating hormones produced by pituitary glands. This remedy helps to overcome certain conditions which are evident due to lower functioning of brain such as drowsiness, depression, irritability, dementias, Alzheimers, Parkinson's and other movement disorders. It is an adjuvant to other remedies.

ब्रेन हमारे शरीर में होने वाली हर गतिविधि को नियमित करता है। ब्रेन का जरूरी कार्य एंडोक्राईन ग्लैंड्स के द्वारा हार्मोंस के लेवल को नियमित करना है। यह दवा पिट्यूटरी एवं थायरॉयड ग्रन्थि को नियमित रूपसे कार्य करने में सहायक है। यह डिप्रेशन, चिड़चिड़ापन, याद न रहना तथा अन्य बीमारियों में सहायक है।

CORPUS LUTEUM

Corpus Luteum has a specific influence over the nutrition of the uterus during the reproductive life of women. Therapeutically it is indicated in delayed menstruation of young girls. It is found of great benefits in relieving the pain in breasts that so disturb some women before and during menstruation. It usually

causes the menstrual flow to become normal when there is pelvic pain, delayed menstruation or insufficient flow and clot formation. It frequently benefits those women who have had repeated miscarriage and repeated curettage, their general health is much impaired and they are morose, nervous and irritable. Great relief has been obtained in the nausea that attends the early months of pregnancy. It is of service in certain cases of sterility, when bacterial infection, cervical stenosis and other local causes can be eliminated

यह महिलाओं की प्रजनन के दौरान गर्भाशय का पोषण करता है। यह युवा लड़कियों में देर से होने वाली माहवारी को ठीक करता है। यह माहवारी के दौरान स्तनों में दर्द के कारण महिलाओं का परेशान होना, गर्भधारण के शुरू के महीनों में उल्टियाँ, चिड़चिड़ा हो जाना आदि में प्रभावकारी है।

KIDNEY

The kidneys are characteristically bean shaped organs, lie on either side of the vertebral column. The right kidney is placed above the left. They function to clear the waste part of the blood in the form of urine. They also help in maintenance of water balance and plasma volume in the cells, tissues and organs. The clinical evidence and demand for kidney products for therapeutic ends are such as to warrant it for a place in albuminuria, and as an adjunct in various kidney disorders, nephritis with indication of approaching ureamic difficulties is often benefitted by the use of renal glomerular substances. The fresh preparations are best. Corresponding Remedies : Lycopodium, Solidago, Hydrastis, Berberis.

इसका कार्य खून में से निर्गुण अश को पेशाब के द्वारा बाहर करना होता है। यह मूत्र के रूप में खून आना तथा पानी की स्थिरता को बनाये रखता है। यह स्वस्थ मूत्र पथ के काम काज को ठीक रखती है। यह गुर्दे की बेहतर रक्त संरचना व गुर्दे की क्षमता को बनाये रखती है।

MAMMARY GLANDS

Hormone of the mammary glands has decided action over the blood supply of the pelvic organs and neutralizes the ovarian action. The administration of an extract of these glands is most useful in the profuse menstruation of young girls, also in cases where the period occurs every two or three weeks. It also induces contraction of the uterus and useful in uterine hemorrhages and discharges, deficient lactation atrophy of the breast.

Caution : It should be used with great care during pregnancy as experiments with animals showed a tendency of causing abortion.

& 450 gms.

GLANDULAR MEDICINES

PANCREAS

Pancreas is a very good remedy to get down the blood pressure. It also suits cases of intestinal indigestion, pain an hour or more after eating, lientric diarrhoea and a number of cases of infections, it is especially suitable for tubercular infections, diabetes mellitus and dyspepsia.

यह एक बहुत अच्छी औषधि है जो बी.पी. को कम करती है। यह आंत में न पचना या अधिक खाना खाने के बाद दर्द, दस्त प्रसार के लिए भी लाभकारी है। यह मधुमेह और पाचन अपच के लिए उपयोगी है।

PARATHYROID GLAND

These are small reddish bodies, four in number about the size of a wheat seed. They are closely related with the thyroid posteriorly. They are not in any way associated with the thyroid, having a structure, function wholly their own. The removal of these glands produces tetany, in which there are tremors and muscular contractions, more or less of the tetanic type. These symptoms are believed to be due to a deficiency of calcium in the blood, and an injection of parathyroid extract or the administration of calcium will prevent the muscular spasm. The agent should be remembered in tetany, when there is a disturbance of the calcium metabolism. It should be remembered in paralysis agitans, although there may be other organs at fault in this disease. It has benefits puerperal convulsions and epilepsy and class of cases where there is muscular irritability. The dose of the parathyroid preparations should be about 1/10 of a grain or less. In many cases it should be given with the thyroid or calcium.

Indications : Paralysis agitans, tetany, puerperal convulsions, epilepsy.

पैराथायराईड ग्लैंड थॉयराईड के पीछे स्थित होते हैं। यह शरीर में कैल्शियम की मात्रा को नियंत्रित करता है। टैटनी में अत्यंत लाभदायक है।

PAROTID GLAND

It has not been demonstrated that the salivary glands have an internal secretion. That there is a connection not anatomical between parotid glands and the gonads is evident, for we see the metastasis occur to the testicle in the male and the ovaries in the female. The seriousness that the case of infections fevers, assumes when the parotid is inflamed would indicate that these glands have more than a simple salivary function. It has been proven that the starch splitting function of the pancreatic juice.

यह देखने पर स्थानान्तरण बीमारी पुरुषों में वृषणों और स्त्रियों में योनि से होती है। गम्भीरतापूर्ण यह प्रसार संक्रामक बुखार से जब कर्णमूलीय सूजन हो जाती है।

GLANDULAR MEDICINES

PINEAL GLAND

Therapeutically it has been found useful in disturbed sexual development in children, tumors, abnormal increase in weight and progressive muscular dystrophy. The baby with patent fontanelle that will not grow needs Pineal and thrives on it. In the case of infant one tenth grain doses should be given daily. mental attitude of the patient, like concentration of personal affairs, and inclination too much self analysis and to narrow view of life generally suggest the administration of pineal. It is very often a useful remedy for men who show signs of premature old ages

यह बच्चों में यौन विकास बजन और माँसपेशियों में कुपोषणता के लिए लाभकारी है। मरीज की दीमागी स्थिति जैसे अपने निजी कार्य और अपने आप काक टुटने और जिन्दगी को छोटे नजरियों से देखने वालों के लिए समय से पूर्व बूढ़े लगते है।

PITUITARY GLAND

Pituitary exercises a superior control over the growth and development of the sexual organs, stimulates muscular activity and overcomes uterine inertia. It is of great use in cardiac failure during severe operations, changeable mood of mind, choking sensation of throat with cough and expectoration, heaviness and pain in abdomen, constipation and excessive urination 7-8 times. pituitary in potency is worth a place in heart attack of old people where sometimes it is hardly possible to pick up a well indicated remedy. It has a special action on anginal attacks due to coronary trouble from chronic uraemic conditions as well as in allergic subjects where it relieves readily.

यह विकास और यौन अंगों के विकास के लिए माँसपेशियों को उत्तेजित करता है। यह खांसी और कफ, पेट में भारीपन, दर्द के साथ गले के धुट सनसनी अधिक पेशाब बार-बार आना और दिल का दौरा पड़ने में लाभदायक है।

PLACENTA

Placenta retards the action of the post pituitary, that ovulation does not occur during the period of placental life. It is useful in nausea, vomiting, convulsion and insaities that occur during pregnancy. If the amount of placental secretion too small, the post pituitary is not balanced and still birth is often the result. Placenta 3x is excellent for mothers whose breast fed infant do not thrive.

यह मिचली, उल्टी, ऐंठन और गर्भावस्था के दौरान होने वाली गडबड़ी में उपयोगी है। जन्म के बाद जब सिर्फ माँ के दूध से शिशु का वजन न बढ़ रहा हो, उन माताओं के लिए लाभदायक है।

GLANDULAR MEDICINES

PROSTATE GLAND

While the gland has not been extensively investigated, there is evidence that, apart from its physiological function, it has an internal secretion has an important part in causing the spermatozoa to become actively motile. The hormone of the interstitial cells of testicles is the probably the stimulus that causes its development. It has been suggested that hypertrophy of the prostate is compensatory to the warning of the function of the testers.

Indications : Atrophy and diseases of the testicles, after operation on the prostates.

प्रोस्टेट ग्रन्थि में आमतौर पर बड़ी उम्र के पुरुषों में सूजन आ जाती है तथा पेशाब में रुकावट हो जाती है। यह प्रोस्टेट ग्रन्थि के कार्य को ठीक करती है।

SPLEEN

The spleen cannot be classed as ductless glands. It acts as a filter to remove particles from the blood also the debris of red and white cells. It seems to produce leucocytes and lymphocytes during intrauterine life. It has a part in formation of red cells. Medical authorities agree that "the exact function of the spleen" is unknown but a number of articles have appeared in prominent medical journals during the past few years in which the pharmaceuticals preparations from it has been commended in the treatment of Malaria. What led to this is the usual abnormal condition of the spleen in suffers from Malaria. It is especially indicated in lingering cases & abnormal states following the disease, French observers say that, It causes a decrease or disappearance of the Malarial plasmodial.

Indications : Malaria, tuberculosis, anemia with demineralization.

यह सूखा रोग, मलेरिया के बाद की कमजोरी, खून में लवण तथा खनिज की कमी, टी.बी. के बाद की कमजोरी, खून में लाल सफेद कोशिकाओं को ठीक करती है।

GLANDULAR MEDICINES

यह फेफड़ों का भारीपन, दमा, दिल का बढ़ना, जिगर का सूखना, काम न करना, बुखार का रहना, चमड़ी पर लाल निशान पड़ना तथा पित्त उछलना, हताश और मानसिक परेशान स्थिति में, आंखों का तनावपूर्ण, कान का दर्द, आदि में लाभप्रद है।

TESTES

The seminal and the procreative part of the testicles is separate in function from the interstitial part. The internal secretion is believed to be formed in the interstitial cells of Leydig in the testes. Since the report of Brown-Sequard in 1889, there has been much interest in the testicular hormone, It does appear to have an influence in cases of poor nutrition, and asthenic state where there is an instability of the nervous system and in conjunction with other glands have a pronounced influence on many of these conditions. Testicular extract contains much nucleoprotein, and like all nucleins has a tendency to lower blood-pressure.

Indication : Sterility , premature senility, arrested growth

नपुसंकता, शुक्राणु का कमजोर होना, अंडकोष का सिकुड़ना आदि।

THYMUS

Thymus is highly useful in arthritic deformans, in cretinism, imbecility, idiocy, in certain cases of exophthalmic goitre when the thymus is enlarged, in rheumatic arthritis, marasmus and menorrhagia. Thymus should be given in cases where there is general over activity of the metabolism and where any gland is over-active. It may also be tried in epilepsy but it might be of service in case not due to injury, as it tends to lower cerebral activity. High potencies are very efficient to exophthalmic goitre.

थाइमस ग्रंथि का बढ़ जाना, जोड़ों के दर्द के साथ सख्त होते जाना आदि।

THYROIDINUM

Acute stupor alternating with restless melancholia, depression, state of idiocy, fearful nightmares. Very excited, excited state followed by considerable depression, irritable and ill tempered mind. (Prominence of eye balls exophthalmic goitre), Optic neuritis, itching of eyes, glaucoma, Icteric tinge of conjunctiva (Jaundice) moist patches behind ears heal up (cases of psoriasis). Flushing with nausea and lumbar pain, loss of consciousness.

यह दुर्बलता, मांसपेशियों में कमजोरी, पसीना, चेहरे और हाथ पैर की तंत्रिका कंपन, झुनझुनी, अत्यधिक मोटापा, स्तन ट्यूमर, कमजोरी और भूख, थकान, कमजोर नाड़ी, बेहोशी, घबराहट, ठंडे हाथ पैर की प्रवृत्ति, कम रक्तचाप, बेचैनी, उदासी, चिड़चिड़ा होना, क्रोध, आंखों की पुतली का बढ़ना तथा बाहर को आना, बड़ी हुई कामेच्छा, अधिक दिन तक तेज बदबूदार दर्द के साथ माहवारी।
